**Jano Graphics Earns FSC Environmental Certification**

**Ventura, CA – June 4th, 2007** - Jano Graphics, a full service print communications company based in Ventura, CA, has recently been certified as a Forest Stewardship Council (FSC) Chain-of-Custody company by Scientific Certification Systems (SCS), a leading sustainable forestry certifier.

Jano Graphics will hold its Chain of Custody Certification for a five-year period, which grants the company permission to use FSC logos on all printed materials utilizing FSC papers. Chain of Custody Certification is given only to qualified companies who follow a process that adheres to the FSC Chain of Custody standards; this process tracks the integrity of raw forest products from production to transportation to manufacturing to distribution – and guarantees FSC-certified products.

From a customer perspective, says Fred Jannone, general manager, “The FSC label shows that we’re following strict guidelines to provide customers with products that are made from viable resources and promoting responsible stewardship of the world’s forests.”

**About FSC**

The Forest Stewardship Council (FSC) is an international not-for-profit membership based organization that brings people together to find solutions to the problems created by bad forestry practices and to reward good forestry management.

FSC is the only independent international timber labeling system applicable to all forest types currently available. The FSC label is a mark of responsible forestry and caters for complex supply chains and processing situations.

## **About Jano Graphics**

Founded in 1977, Jano Graphics is a full service print communications company specializing in quality, full color commercial printing services. In-house capabilities include a state of the art pre-press department, utilizing computer to plate technology and new HD-Offset™ advanced screening technology for higher definition printing, a pressroom consisting of single through six color presses, up to 40-inches with in-line aqueous coating, and a complete bindery and fulfillment operation.
